

## FISHING TOOLS

### ROTARY TAPER TAP

#### DESCRIPTION

It's the simplest fishing tool available for engaging a fish internally to catch drill pipes or drill collars.

#### TO ENGAGE THE FISH

It is necessary only to run the taper tap in the hole to the top of the fish, apply less than one point of weight and rotate sufficiently to embed the tapered threads of the tap into the fish, stop rotation and pull the fish.

#### How to order-Specify:

1) Hole size; 2) Size I.D. of the fish to be caught; 3) Top connection

### ROTARY DIE COLLAR

#### DESCRIPTION

This is the simplest fishing tool for engaging a fish externally.

#### TO ENGAGE THE FISH

You must only run the die collar in the hole to the top of the fish, apply less than one point of weight and rotate sufficiently to embed the tapered threads of the die collar into the fish, cease rotation and pull the fish.

#### How to order-Specify:

1) Hole size; 2) Size O.D. of the fish to be caught; 3) Top connection

### RELEASING & CIRCULATING OVERSHOT

#### DESCRIPTION

It's the strongest tool available to externally engage, pack off and pull fish. During the engaging operation, the overshot is rotated to the right and upward pull is exerted. If the fish doesn't come, circulating pumps may be started and drilling fluid forced through the fish.

#### How to order-Specify:

1) Hole size; 2) Size O.D. of the fish to be caught; 3) Top connection
